INTERIM MANAGEMENT DISCUSSION AND ANALYSIS

Introduction

The following interim management discussion and analysis has been prepared as of December 13, 2004. It is an update of the annual management and discussion filed on SEDAR in November 2004. It should be read in conjunction with the Company's unaudited, interim financial statements for the quarter ended October 31, 2004. The financial statements have been prepared in accordance with Canadian generally accepted accounting principles and all numbers are reported in Canadian dollars.

This discussion contains forward-looking statements that involve inherent risks and uncertainties. The reader is cautioned that actual results may differ materially from those anticipated in the forward-looking statements.

Additional information relating to the Company can be found on SEDAR at www.sedar.com.

Background

No new information to report since annual management discussion and analysis.

Overall performance

Results of operations

	First quarter 2005	First quarter 2004
Net income (loss)	\$(300,810)	\$198,562
Gain on sale of investment	\$112,480	\$279,681
General and administrative costs	\$119,444	\$88,814
Stock option compensation	\$0	\$0
Write down property costs	\$314,193	\$5,995

In the first quarter of fiscal 2005 the Company had a net loss of \$300,810 or \$0.01 per share as compared to net income of \$198,562 or \$0.01 per share for the comparative quarter of fiscal 2004. The following discussion explains the variations in the key components of these numbers, but as with most junior exploration companies the results of operations are not the main factor in establishing the financial health of the Company. Of far greater significance are the properties the Company has, its working capital and how many shares it has outstanding.

In the first quarters of both fiscal 2005 and 2004 the Company sold a significant amount of its investments in other resource issuers to finance its ongoing operations. This resulted in proceeds on sale of \$157,480 and \$311,835 respectively and corresponding book gains of \$112,480 and

\$279,681. The book gains do not represent the actual gains on sale that the Company made as some of the investments had been written down to market value in prior years.

The market value of the Company's remaining investments at October 31, 2004 was \$372,927. This is unlikely to represent what the Company can expect to realize from these investments for their market is very volatile. In December 2004 the Company sold 114,000 Skeena Resources Ltd. for proceeds of \$45,000.

The Company's general and administrative costs rose from \$88,814 in 2004 to \$119,444 in the first quarter of fiscal 2005. The main reason for this was a one time increase in office costs associated with the Company's Australian subsidiary. Total general and administrative costs of the Australian subsidiary were \$54,507. The main components of general and administrative costs in Canada continue to be management fees paid to the Company's president \$18,000 and professional fees paid to the Company's VP exploration \$12,400.

There was no stock option compensation expenses as no stock options vested in the quarter.

The main resource property write-down for the quarter was the Metla property \$307,362. Management decided that the results of the summer exploration program did not justify further expenditures on the property.

Net income (loss) per share	(\$0.00)	(\$0.00)	(\$0.01)

Notes:

- 1) The total revenue consists of gas royalties and interest income.
- 2) There were no discontinued operations or extraordinary items in the periods under review.
- 3) The basic and diluted income (loss) per share numbers were the same in each of the periods under review.

Quarterly results can vary significantly depending on whether the Company has realized any gain on sale of its investment, abandoned any properties or granted any stock options.

Liquidity and capital resources
